Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, 33-43, and 65-75, drawn to a control system for controlling a plant, classified in class 701, subclass 99.
 - II. Claims 12-32, 44-64, and 76-96, drawn to a control system for exhaust system, classified in class 701, subclass 103; and including two patentably distinct species embodied by (1) claims 12-21, 44-53, and 76-85 and (2) claims 22-32, 54-64, and 86-96, one of which must be selected if Group 2 is elected for examination (no generic claim).

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Group I and Group II can be used in a materially different processing.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their difference classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and Groups I and Group II are individually separated and distinct from each other.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purpose as indicated is proper.
